PROFILE

I am a Visual & UX/UI Designer focused on optimizing creative workflows, scaling design systems, and bridging the gap between design and development. Detail-oriented and solution-driven, I leverage my background in digital layout, responsive web design, and front-end understanding (HTML5/CSS/Tailwind) to improve team efficiency and product quality.

With advanced expertise in Figma and Design Systems, I thrive on creating scalable UI components, establishing clear design documentation, and fostering cross-functional collaboration. I enjoy helping innovative teams streamline their processes, manage tool stacks, and ensure seamless brand consistency across all digital platforms.

As a professional, I am hardworking, enthusiastic, solution-oriented, curious, and fast-learning. I am also passionate about web design trends, technology, and innovation. I am eager to collaborate with creative, hardworking, and inspiring individuals who share my passion for web design and digital innovation.
